

RESPONSIBLE TOURISM POLICY

Aware of the need to ensure sustainable tourism development over time, and assuming the principles and objectives of the World Charter for Sustainable Tourism +20, Camping Begur is committed to carry out sustainable management of its activities, through the adoption of commitments aimed at:

Prevent the negative impact of our facilities and activities

Improve and maximize the positive impact that the tourist activity generated in our territory

Optimize the sustainability of the establishment by improving the relationship with the environment

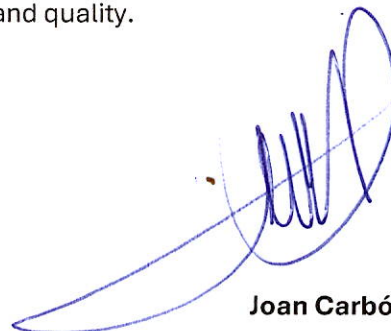

In this framework, our company has adopted the present Responsible Tourism Policy, by which it undertakes to comply with the requirements established in the Biosphere standard, which includes, among others, the legal requirements governing the effects generated by tourism activity.

One of our main goals is to continuously improve sustainable management at all levels: social, economic and environmental. This policy also aims to move towards a model based on sustainable development for the benefit of the environment, cultural diversity and social responsibility.

We acquire an obligation towards the satisfaction of our customers, workers, as well as our neighbours and fellow citizens, understanding tourism as a cross-cutting reality unequivocally linked to a territory.

We are also committed to motivating and training our staff towards the principles of Responsible Tourism, while at the same time promoting good environmental practices in our environment among our clients.

With the assumption of these commitments, Camping Begur is committed to work on consolidation as a differentiated, sustainable tourist establishment, and to be a benchmark in terms of innovation, environment and quality.

Joan Carbó

Director of Camping Begur
